Lori Duguid is a Project Manager and Operations Manager for the Columbus office of Michael Baker, Jr., Inc. (Baker). Lori has over fifteen (15) years of experience in both the private and public sector, in Ohio and other states. Lori's career has focused primarily on traffic engineering, transportation planning, community engagement, smart growth, and livability projects. She has passionately emphasized the consideration of all modes in transportation planning and design. Lori began with Baker in Princeton, New Jersey, where she managed multiple task order assignments for the NJDOT. These assignments ranged from planning level concept development level projects to address safety and operational issues for pedestrians, bicyclists, and motor vehicles, to traffic engineering support for large design projects. Working and living in New Jersey provided Lori with a new perspective on the challenges that face all users in a very congested transportation network. In early 2009, Lori returned to Ohio and spent two years working for ODOT, overseeing their Certified Traffic function as well assisting with strategic planning efforts. She returned to Baker nearly two years ago to oversee the Columbus office and manage projects that benefit all users. Lori evaluates our transportation network with a technical toolbox comprised of skills refined through work outside of Central Ohio, bringing fresh insight and new ways of addressing issues, with a passion for Central Ohio, where she lives, works, plays, and raises a family.

Lori holds a B.S. and M.S. in Civil Engineering from The Ohio State University. She is a licensed professional engineer in the State of Ohio and is a certified Professional Traffic Operations Engineer (PTOE).
