Leeds Forensic Systems, Inc. (Leeds) is the sole manufacturer, and U.S. distributor of the Leeds' LCF3 Firearms Comparison Microscope. As the manufacturer and distributor, Leeds provides on-site installation and training, on-going technical support, and warranty service. The Leeds' service department is available after the sale for scheduled maintenance and recertification.

Unique Specifications for Leeds Firearms and Tool Marks Comparison Microscope (LCF3) includes:

1. Leeds Precision Instruments, Inc. is ISO/IEC 17025 accredited for calibration, providing certificates of calibration for magnification matching and all measurement functions
2. The LCF3 with primary magnification range of 6x – 102x, has a zoom design providing 14 matched magnification positions. Of these 14 positions, 11 are between the magnifications of 6x – 56x.
3. Leeds Universal holder, designed to manipulate various size cartridge casings (from a 0.030" diameter wire to a 10-gauge shot gun shell), requires no additional holder accessories.
4. The dividing line controller is easily adjusted with one hand, allowing the examiner to sweep the dividing line from right to left. Any line width is possible and images can be viewed at any percent age left, right or superimposed.
5. The LCF3 13 watt quad lamp fluorescent lighting system is a brighter lamp with 4 tube bulb system offering a unique rotatable hood that can be adjusted for maximum sample contrast.

Sincerely,

Leeds Forensic System, Inc.
