TechConnect Service Levels

Application Support: Designed for customers who desire a very high degree of personalized support. Rockwell Automation designs support engineers to partner with and support your application. This team visits your site to become familiar with your application drawings and documentation. They record and store application incidents and solutions in a custom Knowledgebase, and trouble-shooting on-demand remote connection is standard. You can choose optional features if you need to.

System Support: Intended for customers with advanced communication, information and process software and complex product customers may include those with advanced HMI and Communication, Information and/or Process software such as RSView@32, FactoryTalk Historian, FactoryTalk AssetCentre and FactoryTalk Batch. You receive system-focused support for my advanced so products. When you need assistance, you work with a dedicated, single point-of-contact who owns your tickets from start to finish to ensure my issues are resolved. Each month, you're invited to participate in a Webinar to learn best practices for using particula

Product Support: Ideal for customers with discrete hardware and basic programming and communication software. Typical cust those with standard PLC®, PanelView™, drive and motion devices and RSLogix™ programming software and/or RSLinx® comm receive product-focused support with single-product, device-level installation, configuration and basic programming. If you need h multiple products, you can open multiple service tickets. And because Training Advisor is included with your support agreement, y team's knowledge and build tailored training plans.

Self-Assist Support: Intended for customers who are experienced engineers with deep understanding of Rockwell Automation p address their own support needs. You rely on online self-help tools and software downloads rather than real-time support options assistance. You can also submit questions via e-mail using the online Support Center for answers within a day.
