These agreements will establish task order-based professional services to augment existing engineering personnel within the Division of Water on an as-authorized, as-needed basis in order to accomplish a wide range of work that may include but is not limited to planning/design/construction phase engineering services, surveying, property acquisition assistance,

hazardous waste identification/remediation, materials testing, and other services required by the Division.

This ordinance will authorize a contract in the amount of \$400,000.00 for each agreement for the estimated engineering needs of the Water Supply Group starting the third quarter of 2022 for approximately one year or until all funds are expended. Two additional future renewals to these engineering agreements are anticipated.

Planning area = “99-Citywide”

6. A narrative timeline for the contract including a beginning date, beginning and ending dates for known phases of the contract and a projected ending date.

a. The total term of the engineering agreement?

General Engineering Services for the Water Supply Group will be provided under task order-based professional services agreements. These original agreements are anticipated to be executed in the third quarter of 2022 to provide funds for approximately one year or until all funds are expended. The DOW anticipates executing two future renewals to each agreement, which will extend the term of each agreement for one year per renewal, or until all funds are expended.

b. The expiration date of this agreement is:

The expiration date of this agreement is approximately one year from the date of execution or until all funds are expended.

7. A narrative discussing the economic impact or economic advantages of the project; community outreach or input in the development of the project; and any environmental factors or advantages of the project.

This contract will provide general engineering services for various tasks which may involve the water treatment process, the equipment, the facilities and/or the resources managed by the Water Supply Group. The tasks performed will assist the Water Supply Group to provide an adequate and safe supply of drinking water which is essential to economic growth and development.

At this time no community outreach or input is anticipated.

One requirement for the consultant awarded the General Engineering Services contract for the Water Supply Group is that the consultant must be able to provide environmental engineering services, if needed. Also, the consultant selected has indicated a corporate philosophy of environmental conservation and sustainable business practices. In addition, the selected team has committed to incorporate sustainability considerations into their projects.

8. An estimate of the full cost of the Contract including a separate estimate of any and all phases or proposed future contract modifications.
