Subject : Ownership of the ArcFM Solution Software

To Whom It May Concern,

This letter is intended to notify the the City of Columbus that Telvent USA, LLC (Telvent) is the sole owner and producer of ArcFM Solution software products. Prior to the 8.x release of the ArcFM product suite, Telvent jointly owned the rights to the software with Environmental System Research Institute (ESRI). With the release of ArcFM 8, ESRI transferred to Telvent the exclusive responsibility of distributing and supporting the ArcFM Solution products.

Source code for Telvent products is proprietary and is not made available to anyone outside of Telvent. While Telvent supports development of specific extensions to the ArcFM Solution through contractual agreements with business partners these partners do not have access to the product source code. Maintenance revenues for the ArcFM suite of products flow directly to Telvent for further product development and enhancements to existing products.

Sincerely,

A handwritten signature in dark ink, appearing to read "Drew Ditter", written over the word "Sincerely,".

Drew Ditter
Director of Commercial Services
