

Information to be included in all Legislation authorizing Entering into Contracts:

The names of all companies bidding, or submitting an RFP or RFSQ

1. Watershed Organic Landscape and Lawn Care
2. Williams Creek Management
3. CTL Engineering, Inc.
4. DBi Services
5. Hickman Lawn Care

The location by City and State of all companies bidding, or submitting an RFP or RFSQ

1. Watershed Organic Landscape and Lawn Care – Columbus, Ohio
2. Williams Creek Management Corporation – Columbus, Ohio
Subcontractors:
 - a. Williams Creek Consulting, Inc. – Columbus, Ohio
 - b. McDaniel's Construction – Columbus, Ohio
3. CTL Engineering – Columbus, Ohio
Subcontractor:
 - a. Buckeye Landscape Services, Inc.
4. DBi Services – DeAngelo Brothers, Inc. – Oak Harbor, Ohio
5. Hickman Lawn Care – Grove City, Ohio

The status, Majority, MBE or FBE, of all companies bidding, or submitting an RFP or RFSQ

1. Watershed Organic Landscape and Lawn Care – MAJ
2. Williams Creek Management – MAJ
Subcontractors:
 - a. Williams Creek Consulting – MAJ
 - b. McDaniel's Construction – M1A
3. CTL Engineering, Inc. – AS1
Subcontractor:
 - a. Buckeye Landscape Services, Inc. - MAJ
4. DBi Services – DeAngelo Brothers, Inc. – MAJ
5. Hickman Lawn Care - MAJ

A full description of all work to be performed including a full description of work to be performed during any known phasing of the contract.

The work under this contract consists of green infrastructure inspection and maintenance services for Department of Public Utilities facilities and sites. The work performed under this contract will be green infrastructure type inspection and maintenance at City of Columbus sites and/or in road right-of-way. There will be two different groups based on similar size or type of green infrastructure.

Bioretention basins are engineered, shallow depressions that treat stormwater runoff using pollutant removal mechanisms that function in natural ecosystems: settling, filtration, absorption, microbial breakdown and nutrient assimilation. Surface runoff is directed into the bioretention area where it temporarily ponds before infiltrating through mulch and a soil media planted with vegetation. The infiltrated water percolates into soils and, if necessary, enters a perforated underdrain that discharges into a water body or storm drain system.

The City is currently responsible for the maintenance of 4 sites with 46 basins located in the Riversouth area of downtown and 16 sites with 36 basins/wetlands and 15 swales located at Griggs, O'Shaughnessy and Hoover reservoirs. Each site may have multiple basins, swales, or other types of green

infrastructures. It is anticipated that additional sites will be added in the future. At this time, there is knowledge of another basin coming online in 2015 that is 2-3 times larger than any basins currently maintained, with other sites coming on line over the next several years. All facilities are located in Franklin, Fairfield, and Delaware Counties. The primary requirements are to inspect the green infrastructure components and repair or replace them if necessary, and to provide general maintenance. The contractor will work with Watershed Maintenance staff when performing maintenance at the basins located at the reservoirs.

Future modifications will be required to incorporate additional green infrastructure into this contract as facilities are constructed and turned over to the City for maintenance.

A narrative timeline for the contract including a beginning date, beginning and ending dates for known phases of the contract and a projected ending date.

Year 1 - September 1, 2014 – August 31, 2015

Year 2 - September 1, 2015 – August 31, 2016

Year 3 – September 1, 2016 – August 31, 2017

An estimate of the full estimated cost of the Contract including a separate estimate of any and all phases or proposed future contract modifications.

Year 1 – \$50,000.00 for 9/1/14 – 2/28/15

Year 1 - \$83,135.25 for 3/1/15 – 8/31/15

Year 2 – \$116,657.21

Year 3 – \$111,105.29

Total Contract: \$360,897.75
