Contract work is required to be completed in a manner acceptable to the City within 120 days from the date that a Notice To Proceed (NTP) is given by the City. The work under this contract shall be completed in a manner acceptable to the City within 120 calendar days after the date of the Notice to Proceed. And other special completion milestones apply; namely that plantings for the bioretention areas may not begin until after September 1, 2015.

7. **A narrative discussing the economic impact or economic advantages of the project; community outreach or input in the development of the project; and any environmental factors or advantages of the project.**

The City has embarked upon its approved Wet-Weather Management Plan (WWMP). Currently, that plan is almost entirely comprised of a series of treatment plant capacity upgrades, storage tanks, tunnels, and other piping system augmentations; collectively known as “gray” infrastructure. After approval of the WWMP, the use of more renewable, sustainable, and environmentally friendly systems, commonly referred to as “green” infrastructure, has been recognized and implemented in many communities as a potential solution to many of the elements associated with consent order requirements.

It is anticipated there will be a greater impact to both economic impact and advantages by implementing a group of smaller projects which would be conducive for competition with local suppliers and vendors as opposed to the large scale, previously devised, WWMP projects. This project begins construction of the Blueprint plan.
