

March 20, 2017

On November 30, 2016, Emerson Network Power was spun off from Emerson Electric Co. to Vertiv Group Corp., an independent, privately-held company. As a global leader in designing, building, and servicing mission-critical infrastructure technologies for vital applications in data centers, communication networks and commercial and industrial applications, Vertiv takes the best of our legacy, the technologies and services that our customers have come to rely on and trust, and combines them with the potential for our future as a new, standalone company.

Vertiv cares about our current business relationships, and will continue to work diligently to minimize any impact that the transaction has upon this relationship. Our teams globally have been hard at work in every functional business area and in every world region to ensure we take the proper steps to prepare to operate as a standalone company, which includes the transfer of assets and assignment of contracts. As part of this transaction, Emerson Network Power, Liebert Services, Inc. will formally change its name to Vertiv Services, Inc., effective as of April 3, 2017.

Notwithstanding the above name change, all other company details - such as tax ID number, physical address, remit-to address, phone numbers, email addresses, etc. - will remain unchanged. Also, any current agreements and/or contracts with Liebert Services will remain active under Vertiv Services.

If you have any questions or concerns, please reach out to your contacts here at Vertiv, call 1-800-543-2378 or visit [VertivCo.com](http://VertivCo.com).

We look forward to our continuing partnership.

Sincerely,

A handwritten signature in black ink, appearing to read 'Frank Bibens', written over a horizontal line.

Frank Bibens

President, Vertiv Services
