

Brooke Michl-Smith, AIA, EDAC, LEED AP

926 Mohawk Street

Columbus, Ohio 43206

614-561-8783

brooke@smithgreenhealth.com

Brooke Michl-Smith has over 20 years of experience in architecture with a broad range of experience including a more recent focus in healthcare design. Specializing in interior architecture and design, Brooke led interior architecture/design and integrated design teams for significant and sizeable projects. Brooke is an expert at gathering fundamental design direction from clients, effectively translating their vision into successful projects from design through construction.

PROFESSIONAL EXPERIENCE

Trinity Health Group, Westerville, Ohio - 2013 to Present

Director of Interior Design - Design Practice Leader

During my tenure with Trinity I have been leading design teams across the firm, encouraging open collaboration to finesse our design solutions, project knowledge and design efficiencies. I have worked with several long-standing clients to develop design standards and more robust project involvement from planning through construction.

Anshen+Allen, part of Stantec Architecture, Columbus, Ohio - 2008 to 2013

Senior Design & Planning Architect

Anshen+Allen encouraged a culture of environmental awareness, collaboration and integration. While there I was strategically involved in a variety of projects, from The Ohio State Biomedical Research Tower tenant fit-out to St. Mary's Hospital for Children in Queens, New York. This experience has formed my belief that the built environment can and should influence our lives and experiences for the better and has fostered my professional goal of achieving design excellence through experiential design and integration.

Karlsberger Companies, Columbus, Ohio - 2004 to 2008

Design Architect

I had the good fortune of working with tremendously talented and knowledgeable healthcare design professionals at Karlsberger. I gained in-depth experience in medical planning and design of large and small-scale healthcare projects. Our design team shared a mutual belief in the power of an integrated and collaborative project process that has evolved and strengthened over time. This was a time of great learning and fantastic exposure to the arena of healthcare design and environmental sustainability.

NBBJ, Columbus, Ohio - 1996 to 2004

Designer

My strengths in developing well designed interior spaces were greatly enhanced at NBBJ. I had opportunities to work on a vast array of project types including corporate, civic, higher education and healthcare, which proved to be a turning point in my career path. Healthcare design offered continual learning opportunities and the belief that our design solutions truly affect human health and well-being.

Ann Beha Associates, Boston, Massachusetts - 1988 to 1996

Designer

A small and prestigious boutique design firm specializing in historic preservation and restoration of civic, cultural and religious buildings, Ann Beha Associates was the perfect firm to explore restoration and adaptive reuse of historic buildings, which has always been the inspiration for my love of architectural design. During my time with ABA I was offered tremendous project opportunities through all aspects of project development from detailed schematic design through construction administration.
