OnBase Fundamentals	Hyland Software, Inc.	OBWIP1-C	OBWIP1-C	For both OnBase and Perceptive customers, this Brainware Intelligent Capture class will introduce learners to the basics of installing and creating a project from the ground up. Students will have the opportunity to learn about Classification and Extraction engines in order to make the best choices for the documents and fields they wish to capture. They will experience these methods using both Structured and Unstructured document types and will create a fully functioning project using the Designer and Runtime Service applications. Students will also experience the Worker application and work with Exception Handling states as a part of their solution.	Per Person at Hyland	\$2,720.40
