EXPERIENCE

PLANNER & PROJECT MANAGER

ms consultants | 01.2018 - present
Columbus, OH

Develop project work plans, engagement strategies, and final deliverables for downtown, area, comprehensive, and regional plans. This work includes regular client and steering committee meetings, public meetings or events, and council presentations. Final documents include data analysis, technical writing, and illustrations of existing conditions and desired results such as maps, diagrams, and graphic elevations and site plans.

A specific focus has been on increasing public engagement efforts and attendance through 'community events' in place of traditional public meetings. Utilizing creative and inclusive marketing and engagement tools to connect with area residents and empower them to share ideas and take ownership of their community's future. This has led to a stronger end product, as well as a higher probability of plan implementation.
