Subject: PWS LTO Pre-Application/Inventory Application

The Division of Drinking and Ground Waters (DDAGW) has developed an online application that can be used by public water systems to update contact and inventory information for their water system. The online application allows the user to update phone numbers, email addresses, and mailing addresses for the owner, administrative, and financial contacts. In addition, the user can also update the water system's population, service connections and seasonal period if they are closed partially during the year. The user can also generate a "PWS Operator of Record (ORC) Notification Form" that can be printed off for signatures and submitted to DDAGW's Operations Section.

The online application should to be accessed and water system information verified or updated by **October 30, 2019** so that accurate information can be used to generate the water system's 2020 License to Operate (LTO) invoice and to ensure the invoice is mailed to the correct address. The online application will provide a preliminary projection of what the expected 2020 LTO fee will be for the water system.

The online application can be accessed from the DDAGW PWS website at: <https://epa.ohio.gov/ddagw/pws> and clicking on the License to Operate tab. On the License to Operate tab there is a link under the LTO Preapplication/Inventory Portal section to Ohio EPA's Customer Support Center that will access the online application. There is also a link to instructions on how to use the online application. To login, you will use the following username: rcwesterfield@columbus.gov. Each account has been associated to the water system(s) according to DDAGW's current contact information. You have been identified as being responsible for the system(s) listed in the table below. If this information is incorrect, please e-mail Brian Tarver at brian.tarver@epa.ohio.gov or call him at (614) 728-1740.
