John,  
Attached are more specs and additional UTC light duty vehicles for fleet approval. Some of these were budgeted in 2020 and some are for 2021 budget. All will have a 1 for 1 turn in. Most notable in these is the F450 diesel truck to be have a dump body installed as we had discussed several weeks ago. Fiscal noted that I have Fairwood address on these for delivery. It is common for me to have equipment delivered directly to the location and Fleet comes out to finish the brass tag. None of these will have decals. Do the trailers need delivered to Fleet first? I will adjust as needed.

All items will need to be entered into DAX to be bid out and the light duty vehicles will need the money legislated for purchase. Let me know if you have any questions on these.
