1. BACKGROUND

This ordinance authorizes the Director of Public Utilities to enter into a construction contract with General Temperature Control, Incorporated, for the Southerly Waste Water Treatment Plant EAC HVAC and Air Purification project, CIP #650372-100000, in an amount up to \$7,583,290.00; and to encumber funds with the Department of Public Service for prevailing wage services in an amount up to \$2,000.00, for a total expenditure of \$7,585,290.00.

The HVAC & Air Purification Units in the Southerly Waste Water Treatment Plant (WWTP) East Aeration Building are approaching the end of their useful life and are becoming increasingly difficult to repair and maintain. Furthermore, the current configuration is inefficient and overly complex. The project consists of installing a new HVAC and air purification system according to the detailed plans and specifications set forth by the design engineer. This includes making necessary structural modifications to facilitate the system's installation, ensuring compliance with contemporary building standards, and integrating the system seamlessly with the facility's current Supervisory Control and Data Acquisition (SCADA) system, with the objective of achieving an upgraded, efficient, and fully functional system.

The Community Area for this ordinance will be 64, Far South.

TIMELINE: Contract work is required to be completed in a manner acceptable to the City within 365 days from the date that a Notice to Proceed (NTP) is given by the City.

ESTIMATED COST OF PROJECT: The bid amount and proposed award amount is \$7,583,290.00, including a 10% construction contingency amount that will be utilized to fund needed and approved changes in the work. No contract modifications are anticipated at this time; however, construction exigency might later compel modification of this

contract if unforeseen difficulties are encountered.

Cost summary:

Future Anticipated Needs	\$ 0.00
Prevailing Wage Services	\$ 2,000.00

7. FISCAL IMPACT

The construction portion of this project is anticipated to be financed with a loan from the Water Pollution Control Loan Fund (WPCLF), a program jointly administered by the Ohio EPA's Division of Environmental and Financial Assistance and the Ohio Water Development Authority (OWDA). City Council authorized this loan application and acceptance of funding via Ordinance 2767-2023, passed by Council on 10/30/23. The loan is expected to be approved in May, 2024. Funds will need to be certified against the Sanitary Sewer Reserve Fund, Fund 6102, to proceed with this project until the loan has been approved.

Funds will need to be appropriated within the Sanitary Sewer Reserve Fund, Fund 6102, transferred to the Sanitary Revolving Loan Fund, Fund 6111, and then appropriated in the Sanitary Revolving Loan Fund, Fund 6111, in order to fund this expenditure. This transaction is a temporary measure that is required until such time as the division is able to execute a loan with the WPCLF and reimburse the Sanitary Sewer Reserve Fund. An amendment to the 2023 Capital Improvement Budget is needed to reflect the loan funding for this project.

Funding in the amount of \$2,000.00 is appropriated and available within the Sanitary Bond Fund, Fund 6109, to pay the Department of Public Service to provide prevailing wage services for this project. An amendment to the 2023 Capital Improvement Budget is necessary to align budget authority with the proper project.
