BACKGROUND: The Department of Public Utilities, Division of Power, and Ohio Power Company d/b/a American Electric Power (AEP Ohio) own and operate electric distribution systems throughout the City of Columbus and through a joint use agreement have attached their facilities to poles owned by the other party. American Electric Power must replace certain poles to comply with the Public Utilities Commission of Ohio (PUCO) requirements. In cases where the City's electrical facilities are attached to the poles that must be replaced, those facilities must be moved from the old poles to the new poles. The Division of Power does not have enough available power crews to accomplish removing the City's facilities from these poles in time to meet the demand. In order to expedite the process, American Electric Power will handle the transfer of the City facilities and will bill the City for the costs incurred. Since AEP Ohio will handle the removal of the City's facilities as well as facilities owned by others at the same time, it has been determined that this would be the fastest and most cost effective method. The cost for these services through 2014 is estimated at \$35,000. The total number of poles requiring relocation of attachments is not known and there may be a need to present legislation at a later date to increase funding for the project.

American Electric Power (AEP Ohio) is the sole source for this service since they are the owner of the poles in question. Their contract compliance number is 314271000, expiration 7/11/2014.

The company is not debarred according to the Excluded Party Listing System of the Federal Government or prohibited from being awarded a contract according to the Auditor of State Unresolved Findings for Recovery Certified Search.

Emergency action is requested in order that services may continue without interruption to comply with PUCO requirements and that reimbursement for said service may be made in a timely manner.

FISCAL IMPACT: There are sufficient funds budgeted for this expenditure in the 2014 Power operating budget. In 2012 the Division spent \$31,530.00 for this service and in 2013 another \$12,851 was incurred.
