A residential appearing roof shall be defined as a roof structure with a minimum pitch of 6:12 and a maximum roof of 12:12. The height of the roof element shall not be less than 40% of the overall height of the building as measured from finish floor to top of roof. Once the roof element has reached the 40% level, then the roof may be flattened or depressed so long as the flattened or depressed portion of the roof is not visible from adjacent parking, service areas or roadways. The sloped roof noted above shall not be finished with one of the following materials: dimensional asphalt shingles, wood shakes, slate, composite slate, tile, standing metal seam, or copper. Roof requirements shall not apply to service station canopies.~~

~~B. A.~~ A maximum of three building material types shall be utilized for the exterior of any building including roof material. **No roofs of metal only, mansard roof can be metal but all other roofs shall be constructed of shingles of asphalt or wood shakes.** Minor accenting of structures through the use of a fourth building material shall be permitted. At least 30% of each structure, located on an outparcel developed in conjunction with or as part of a single identified shopping center, shall be constructed of materials common to other such outparcel structures. This will achieve overall architectural uniformity.

~~C. B.~~ No materials, supplies, equipment or products shall be stored or permitted to remain on any portion of the parcel outside the permitted structure.

~~D. C.~~ Mechanical equipment or other utility hardware on the roof of a building shall be screened from view by same materials utilized on building roof or exterior. Color shall also match building exterior or roof. Mechanical and all other equipment on the ground shall be fully screened from view by wall, fence or landscape material utilizing the same material or character of the building.

~~E. D.~~ Building illumination shall be permitted provided such light source is concealed. No colored light shall be used to light the exterior of any building.

~~F. E.~~ Blank facades on rear of building will not be permitted, therefore, articulating such facades with recesses, fenestrations, fences or pilasters is required. Such articulation shall be evenly spaced along the building elevation at a distance no greater than 20 foot - 0

inches.

G. F. All buildings shall be finished utilizing the same materials on all sides of the exterior.

H. G. It is recommended that in addition to using building mass, individual elevations must be articulated with fenestrations, pattern or structural expressions equally on all sides of the structure. Through the use of articulated building elements such as porticoes, dormers, recesses and other such elements, the overall building mass will appear to be reduced and will reflect a residential character.

SECTION 2. That the existing limitation text for Subarea 1 in Section 5 of Ordinance #366-92, passed on March 9, 1992 (Z91-052) is hereby repealed.

SECTION 3. That this ordinance shall take effect and be in force from and after the earliest perior allowed by law.
