This legislation authorizes the Director of Public Utilities to pay the State of Ohio, Environmental Protection Agency (OEPA), penalties for combined sewer overflows, sanitary sewer overflows, and wastewater treatment plant bypasses that occur in 2023 and 2024.

The City’s sewer system occasionally experiences combined sewer (CSO) or sanitary sewer overflows (SSO) due to wet weather and dry weather events. Wet weather events are more common and often due to heavy rains, while dry weather occurrences are due to collection system blockages often caused by roots or debris. Bypasses are overflows or untreated releases into the environment. The City and the State of Ohio entered into Consent Orders in 2002 and 2004 to address concerns related to bypasses and each type of overflow.

Overflows and bypasses are often weather-dependent, which makes occurrences vary from year-to-year. For example, 2022 was a relatively wet year, with 5 bypasses at either the Southerly or Jackson Pike Wastewater Treatment Plants, 17 dry-weather SSOs and 286 wet weather SSOs. 2023 has been a relatively dry year.

The Consent Orders stipulate fines to be paid for CSO and SSOs, the amount of which depends on the type and number of event. These parameters are shown in the table below:

Event	Amount Per Event	Due Date
Dry Weather SSO	\$1,500	March 1st, each year
Wet Weather SSO		March 1st, each year
<i>1-250 events</i>	\$2,500	

251-500 events	\$12,500	
> 500 events	\$20,000	
Southerly Bypass	\$2,000	March 1st, each year
Dry Weather CSO	\$2,000	Within 45 days of event
Jackson Pike Bypass	\$2,000	Within 45 days of event
