**BACKGROUND:** This legislation authorizes the Finance and Management Department to expend monies for labor, materials, equipment, standard services, and professional services in conjunction with various energy efficiency and energy management related projects. Energy costs are a significant part of annual operating expenses and the city's use of such energy sources has economic and environmental impacts. The purpose of this ordinance is to set aside funds to further the city's energy efficiency goals. This may include, but is not limited to, such items as; upgrading interior and exterior lighting fixtures, upgrading pneumatic controls to direct digital controls, various small-scale HVAC, electrical, and control system projects, among others. Previous projects funded from this capital source include: conversion of Police range to LED lighting, City Hall Energy Audit, such as air handler run cycles, programmable thermostatic valves, supply line insulation, and Retro-commissioning of control system at East Central Health center. All work will be done in accordance with the competitive bidding provisions of the Columbus City Codes. Funding for these expenditures will come from the General Permanent Improvement Fund.

**Emergency action** is requested so the Finance and Management Department can further energy management and efficiency initiatives.

**Fiscal Impact:** These funds are available in the General Permanent Improvement Fund and result from rebates and incentives earned from prior energy efficient upgrades. Ordinance 2915-2014 authorized \$185,000 for similar purposes in 2014.
