1. BACKGROUND

The Division of Planning and Operations is responsible for roadway pavement markings to promote pedestrian safety and expedite vehicular traffic flow. Some of the uses of these markings include lines to mark traffic lanes, turn arrows, wording to describe the pattern of traffic for a specific lane such as ONLY (as in right turn only). These pavement markings are used throughout the City to promote pedestrian safety and expedite vehicular traffic flow. Another product used for these roadway markings is reflective glass spheres. This commodity is used on top of the pavement markings to make them reflective in order for them to be seen at night. The Department of Public Service, Division of Planning and Operations requires these products for City roadways.

The Purchasing Office solicited formal competitive bids and established universal term contracts (UTCs) for the purchase of these commodities which the Division of Planning and Operations requires.

This ordinance authorizes purchases of commodities per terms and conditions of these existing UTC contracts:
