### 1. BACKGROUND

This Ordinance authorizes the Director of Public Utilities to modify and increase the professional engineering services contract with Strand Associates for the SMOC Facility Stormwater Improvements project, CIP 611021-100000, in an amount up to \$80,222.36 to pay for services needed through the completion of construction for this project.

The project will install green infrastructure at the Department of Public Utilities Fairwood facility resulting in reduced runoff and improved water quality. The project will also reduce inflow to the sanitary system, mitigating sewerage overflows. Strand Associates (Strand) is designing the improvements. Strand has completed preliminary design, prepared a design report, and prepared draft final construction plans. This modification will fund completion of the final construction plans, finalization of building permits, construction procurement services, and provide services during and post construction.

The project is located at 1250 Fairwood Avenue within the South Side (63) planning area.
