BACKGROUND: This legislation authorizes the Director of Public Utilities to enter into an engineering agreement with Evans Mechwart, Hambleton & Tilton, Inc. (EMH&T, Inc.). for the Blueprint Stormwater Sewer System Assessment - West Franklinton, CIP 611625-100002. This project is needed in order to restore the hydraulic capacity of the existing storm infrastructure as well as to identify any necessary repairs so as to extend the useful life of the asset. The project will also reduce stormwater flooding issues in the neighborhood and create positive outlets for the new green infrastructure and downspouts that will be installed as part of the Blueprint projects. This project will provide incremental funding to assess, clean and inspect all storm sewer infrastructure within the Yale-Edwin & Green - Glenwood Blueprint areas so that the hydraulic capacity of the existing storm infrastructure is restored which will reduce neighborhood stormwater flooding issues and create opportunities for the installation of green infrastructure. This work will occur in the West Franklinton Area, and the limits of the project are bounded by West Broad Street on its northern and West Mound Street on the southern extents and by interstate 315 and Townsend Avenue on its eastern and western extents.

(For additional information regarding the OEC tasks, please see the attached Director's Information Sheet Section 5.)

ECONOMIC IMPACT:

The use of more sustainable, and environmentally friendly systems, commonly referred to as “green” infrastructure, has been recognized and implemented in many communities as a potential solution to many of the elements associated with EPA consent order requirements. Green infrastructure also provides additional stormwater treatment benefits, as well as potentially mitigating street flooding and impacts to receiving streams. It is anticipated that the construction of green infrastructure will have an impact on the local economy by creating the need for personnel to construct and maintain the proposed facilities, as well as obtaining project related materials from local suppliers and vendors. Prior to the design of the green infrastructure, the existing storm sewer system must be cleaned and televised to ensure that green infrastructure designs can be achieved.

FISCAL IMPACT: This legislation authorizes the Director to transfer within and expend up to \$1,019,511.78 from the Storm Sewer Bonds Fund.
