Background: This ordinance authorizes the Director of the Recreation and Parks Department to enter into contract with Prime AE Group, Inc. for the design of lobby renovations at various community centers.

In the summer of 2016, Recreation and Parks Planning and Design Staff visited all of the department's community centers to consult with center staff and compile a list of needed improvements at each of the centers. One of the major items identified during these visits was the need to renovate several community center lobbies in order to create a more accessible, welcoming, and safer experience for visitors. Centers that were identified as needing lobby renovations include Adams, Barack, Barnett, Beatty, Feddersen, Holton, Howard, Tuttle, Woodward, and Douglas Community Centers.

This contract will be for professional services for the design of the lobby renovations. The renovations are to be primarily focused on aesthetic improvements, as well as improvements to the functional layout and operations of each center's lobby. In addition to the lobby, the project will also include the adjacent office and circulation space. Also, the A/E will provide design services for the replacement of doors and windows at the Thompson Community Center.

This initial contract will be for the Program Verification and Schematic Design Phases of the project. It is the intention of the Recreation and Parks Department to request a legislated contract modification to this contract to provide additional funding for professional services for the Design Development, Construction Documentation, Bidding, and Construction Administration phases of the project, at a later date.

The costs for this project will be \$144,572.68 with a contingency of \$14,500.00 for a total of \$159,072.68.

Proposals were advertised through Vendor Services, in accordance with City Code Section 329, on September 26, 2017 and received by the Recreation and Parks Department on October 16, 2017. Proposals were received from the following companies:

Emergency Justification: An emergency is being requested in order to begin the design process this spring with the intent of bidding the construction of the renovations during the fall of 2018 with work to begin in early 2019, prior to the busy summer season.

Benefits to the Public: This project will benefit the city and the surrounding community by improving the aesthetics and functionality of the local community centers. Residents will be more likely to visit their community center when the lobby feels safe and welcoming. They will also benefit from the improved functionality of the lobby that will result in better service from community center staff.

Community Input Issues: The main source of input on this project so far has been from CRPD Recreation Programing Staff including community center managers and staff. These staff members work in the buildings on a daily basis and are very familiar with what improvements are needed to better serve their visitors. However, as the project continues to move through the design process, community center visitors will be able to be engaged directly to see what lobby improvements they would like to see at the community centers.

Area(s) Affected:
