BACKGROUND: This ordinance NO. 1321-2020 authorizes expenditures of \$1,150,000.00 for the upgrade (and support) of Dynamics AX 2012 to Dynamics 365 Finance and Operations (Project ELEVATE) change in project duration due to the COVID-19 public health emergency. This legislation authorizes the City Auditor to modify contracts with OnActuate Consulting Inc., Knowledge Services, Microsoft Corporation/Dell, Navigator Management Partners and/or such additional consultant vendors as may be necessary.

The City implemented Microsoft Dynamics AX 2012, R3 for Public Sector Industry as its financial management system on January 1, 2016. Approximately 600 active users and 7,000 vendor contacts utilize the system. The City was in the process of migrating to Dynamics 365 Finance and Operations, Project ELEVATE, when the Mayor declared a State of Emergency for the City of Columbus related to COVID-19.

As a result of the Declaration of State of Emergency, City resources critical to Project ELEVATE were transitioned over a period of time to working remotely and the majority of project resources were essential employees focused on COVID response efforts in maintaining operations for health, safety and welfare during the crisis. Thus, resource availability for continuing work on Project ELEVATE dropped by over 60%. Progress was made during this time period, but not within the timeframes in the project plan.

The City's Department of Technology was instrumental in providing remote work capability for employees so they could access Dynamics 2012, which is only accessible from the City of Columbus Network. Without access to the City network, financial operations city-wide would have been significantly impacted. The public health emergency highlighted

our need to improve telework capabilities and provide access to the City financial system outside of the City of Columbus Network.

In an effort to improve telework capabilities and support functions of government such as financials (budgeting, purchasing, accounts receivable, etc.) the City Auditor has added the following goals to Project ELEVATE.

1. Extend the implementation project timeline of D365 Finance and Operations (\$340,000) in response to the COVID 19 induced delays and also ensure the City's financial management system will be accessible from any internet connected device (PC, tablet, phone). The user will not be required to remotely connect to their desktop on the City of Columbus network in order to access the application and perform applicable job functions. D365 will be hosted by Microsoft and the project timeline extension will allow the necessary components to be put into place to support this.
2. Implement Microsoft Point of Sale (POS) to replace Tyler Cashiering (\$380,000). POS shall be accessible from any internet connected device (PC, tablet, phone). Tyler Cashiering is a desktop application used by multiple City departments for accounts receivable functions that can only be accessed when the user is connected to a City computer on the City of Columbus Network that has Cashiering installed. Microsoft POS improves telework capabilities and support functions of government accounts receivable and would allow payment to outstanding AR invoices, allow entry of deposits, etc. Point of sale will be posted by Microsoft.
3. Virtual Training. In an effort to comply with social distancing and/or stay at home orders, training for Dynamics 365 will be developed as a virtual curriculum rather than face to face training. The training coordinator will develop a virtual class curriculum utilizing training development software (\$2,500) and teleconference capabilities allowing us to properly train 600 users on D365 prior to go-live without requiring attendance in person or in close proximity to other users.

In addition, this ordinance authorizes the expenditure of up to \$248,000 to Knowledge Services, Navigator Management Partners and/or such additional consultant vendors as may be necessary. The City Auditor requires the ability to contract with additional vendors to provide resources for staff augmentation. This ordinance would authorize the City Auditor to contract with the following current State term schedule holders as needed:

- State of Ohio's IT Staff Augmentation Contract (state term schedule) with Knowledge Services or the current contract provider for any additional IT staff needed to assist in upgrade of Dynamics 2012 to Dynamics 365 Finance and Operations and implementation of Point of Sale.
- State of Ohio STS-033, schedule 534431, with Navigator Management Partners for organizational change management resources.

In addition, this ordinance authorizes the expenditure of up to \$25,000 for Azure/web environments for a publicly facing Vendor Portal to register vendors and display open request for quotations and Point of Sale Azure specifications.

Finally, this ordinance contains funding for contingencies that may arise in the project and allows the project manager to authorize change orders in the scope of work as needed to see the project to a successful conclusion.

FISCAL IMPACT: Funds for this project will be certified against the Special Income Tax fund 4430 and reimbursed with funds from a future bond sale.
