The purpose of this ordinance is to amend ordinance 0312-2021 in order to correct the requested funds for the continuation of the NPDES Stormwater and Clintonville Blueprint Monitoring Project through December 31, 2022. Total amount for modification No. 5 should be \$100,000.00. Total amount including this modification is \$1,405,713.72.

The purpose of ordinance 0312-2021 was to authorize the Director of Public Utilities to modify, increase and extend the contract with The Ohio State University, Office of Sponsored Programs, for the NPDES Stormwater and Clintonville Blueprint Monitoring Project for the Division of Sewerage and Drainage, Stormwater and Regulatory Management Section, to authorize the expenditure of \$238,520.26 from the Storm Sewer Operating Fund.

The reason that Public Utilities is requesting this amendment is to bring the requested funds into alignment with the actual funds budgeted for 2021. The ordinance 0312-2021, passed March 1, 2021 and signed March 4, 2021, incorrectly requested \$238,520.26 for the Program as laid out in the Ord 0312-2021 Info Form instead of the amount of \$100,000.00 that Stormwater requested for the 2021 budget.

**FISCAL IMPACT:** Auditor’s Certificate #ACPO006294 from Ordinance 0312-2021 will be cancelled and a new one created for the new contract. \$100,000.00 is budgeted and available for this program.

**EMERGENCY DESIGNATION:** This ordinance is being submitted as an emergency to allow for the establishment of

the amended contract without delay.

This legislation authorizes the Director of Public Utilities to modify, increase and extend the contract with Ohio State University, Office of Sponsored Programs for the purpose of providing professional engineering services for the NPDES Stormwater and Clintonville Blueprint Monitoring Project for the Division of Sewerage and Drainage, Stormwater and Regulatory Management Section.

The City's Stormwater National Pollutant Discharge Elimination System (NPDES) permit requires the City to monitor discharges from its municipal separate storm sewer system (MS4) during wet weather events. Monitoring and data collection services performed under this project will allow the City to meet its permit obligations. Wet weather monitoring will be performed at Stormwater outfalls to characterize the change in quality and quantity of discharges from outfalls in the Clintonville Blueprint Project Area after the installation of green infrastructure (GI). Simulated storm events will be used to quantify changes on storm water quality and quantity from selected GI practices. Tasks associated with this project include all outfall sampling, laboratory analysis, laboratory data evaluation, report generation, and project management. Additional data collection and analysis will be performed to determine to what extent property values increase or decrease as a result of the installation of GI, to evaluate changes in other selected social and economic indicators, and to evaluate the effect of GI on habitat and bio diversity.

As a non-profit organization, the Ohio State University, Office of Sponsored Programs will ensure continued compliance with the City's Stormwater NPDES permit, to measure the performance of GI installations for the purpose of improving the design and planning of future projects, to measure the economic, social, and environmental impact of a large-scale GI project on the community in which it is installed.
